1.1.2.2 Intended purposes

Listing of the intended purposes for the functional families that are covered by the technical documentation.

Functional Family	Intended purpose
Abutments	The abutments, which are part of prosthetic retaining elements, are screwed into implants and are intended for use in prosthetic restorations on dental implants to support procedures in the dental clinic or laboratory.
Case Guides	The case guides are used to determine the divergence of the implant's axes between the implants for the abutments CM LOC® and CM LOC® FLEX.
Female parts	The female parts, which are part of prosthetic retaining elements, are bonded or directly polymerized into the removable dentures and are intended for use in prosthetic restorations on dental implants or on root canal caps to support procedures in the dental clinic or laboratory.
Male parts	The male parts, which are part of prosthetic retaining elements, are soldered onto individually fabricated root canal caps and are intended for use in prosthetic restorations on root canal caps to support procedures in the dental clinic or laboratory.
